

What is claimed is:

1. ~~An electronic still camera with a printer incorporated therein, the electronic still camera being capable of picking up an electronic image signal from a subject through an imaging device and printing an image on a recording material based on the electronic image signal, characterized by comprising:~~

2. ~~a monitor that is incorporated into a camera body and is able to display an image based on the electronic image signal at approximately the same magnification as when the image is printed on the recording material by the printer.~~

3. ~~An electronic still camera as claimed in claim 1, wherein the monitor has a screen size that is approximately equal to a predetermined printing area of the recording material.~~

4. ~~An electronic still camera as claimed in claim 1 or 2, wherein the monitor consists of pixels that are approximately equal in number to pixels of the image printed in a predetermined printing area of the recording material.~~

5. ~~An electronic still camera as claimed in claim 1, wherein the monitor is an LCD panel.~~

6. ~~An electronic still camera as claimed in claim 1, wherein the recording material is a self-developing type instant photo film.~~

~~6. An electronic still camera as claimed in claim 2,~~
further comprising an electronic viewfinder for displaying
moving images of the subject in a real time fashion based on
the electronic image signal picked up through the imaging device,
5 wherein the electronic viewfinder is smaller in size than the
monitor.

7. A printer for printing an image on a recording material
based on electronic image signal, comprising a monitor that is
10 incorporated into a printer body, for displaying an image based
on the electronic image signal at approximately the same
magnification as when the image is printed on the recording
material.

8. A printer as claimed in claim 7, wherein the recording
15 material is a self-developing type instant photo film.

9. A printer as claimed in claim 7, wherein the monitor
has a screen size that is approximately equal to a predetermined
20 printing area of the recording material.

10. A printer as claimed in claim 7 or 9, wherein the
monitor consists of pixels that are approximately equal in
number to pixels of the image printed in a predetermined
25 printing area of the recording material.

11. A printer as claimed in claim 7, wherein the monitor
is an LCD panel.
